FEATURED BENEFITS

- ☑ S-Blade grass products features our exclusive Luster Guard ™ yarn technology. This technology produces an extremely low luster and more natural looking blade while still maintaining complete ultra violet stability and performance.
- ☑ In addition to using special, low luster resins, the S-Blade profile is extruded with a very precise ribbed texture on the surface of the blade. This unique and exclusive texture reduces light from reflecting off the surface, achieving a non-shiny appearance. Innovation like this helps attain a very natural look comparable to real grass.
- ☑ S-Blade yarn is incredibly durable and retains its great look day in and day out for years on end. The S-Blade construction gets rid of weak points to produce unprecedented split resistance. And because S-Blade technology makes a mono-filament so split resistant, there is no need to resort to a thicker blade. S-Blade gives you a lush, more natural looking grass that feels soft to the touch.
- ☑ Drainage rate:> 30 inches per hour
